OnlineMedicalCard: technology versions

MERN stack with Tailwind CSS. Versions looked up on 12 October 2026 using npm view.

Frontend (client)

Package	Version	Role
react / react-dom	19.3.0	UI library
react-router-dom	7.18.4	Page routing
tailwindcss	4.3.3	Utility-first styling (CSS-first config, no tailwind.config.js)
@tailwindcss/vite	4.3.3	Tailwind plugin for Vite
vite	8.3.4	Dev server and production build
@vitejs/plugin-react	6.1.2	React support for Vite
axios	1.20.0	HTTP client

Backend (server)

Package	Version	Role
express	5.3.0	HTTP API (async errors handled natively)
mongoose	9.11.1	MongoDB models and queries
jsonwebtoken	9.0.3	Login tokens
bcryptjs	3.0.3	Password hashing
zod	4.6.6	Request validation
helmet	8.3.0	Security headers
cors	2.8.6	Cross-origin access for the client
express-rate-limit	8.7.1	Rate limiting on auth and contact routes
dotenv	18.0.7	Environment variables
nodemon (dev)	3.1.14	Auto-restart during development

Runtime and database

Tool	Version	Notes
Node.js	24 LTS or 26 LTS	Node 24 is the Active LTS today. Node 26 becomes LTS in October 2026. The project requires 22 or newer. The build in this workspace ran on Node 22.22.0.
npm	10.9.4	Used for installs and the build.
MongoDB Server	8.0.x (8.3 also works)	Not an npm package, so install it separately or use MongoDB Atlas. Latest patches seen: 8.0.28 and 8.3.7.

What was checked

The client production build completed without errors, and every server file passed a syntax check. The API was not run against a live MongoDB here because no database was available in the build workspace, so test registration, booking and the admin screens on your machine after running the seed script.

Install and run

```
cd server && cp .env.example .env && npm install && npm run seed && npm run dev
cd client && npm install && npm run dev
```

To update later: run npm outdated in each folder, then npm update. Check a single package with npm view package-name version.
